

## Report on recycled and recyclable content in a L.System desk from GUIALMI

Centro Tecnológico da Cerâmica e do Vidro (Technological Center for Ceramic and Glass from Portugal) hereby declares to have performed an audit to confirm the incorporation of recycled materials in the Guialmi products, produced by GUIALMI - Empresa de Móveis Metálicos, located in Águeda, Aveiro, Portugal.

Recycled materials includes the materials that have been reprocessed from recovered material into a component for incorporation into a final Guialmi product.

Recyclable materials includes the materials that after the use of the Guialmi products (end of life) can be collected and disassembled into materials that are able to be recycled.

It was confirmed that the percentage of recycled materials incorporated into the production process and recyclable content is as follows:

Product, references of the office furniture	L.System desk
% Recycled material included	48%
% Recyclable content	> 95%
Sources	Suppliers and other available information

The calculations of recycled content are based on data provided by suppliers and other available information including the documental management system of Guialmi, as well as a visit to the production unit. This data may include industry averages or ranges or other. Conservative assumptions were made when compiling this information to provide the most accurate recycled content and recyclable content calculations possible.
